

Writing (Paragraph)	Writing (Essay)	Creating
Select two animals. Write one to two paragraphs comparing and contrasting these animals.	Imagine that you had the chance to meet anyone in the world. Write a letter to your teacher explaining the reasons why you would like to meet that person.	Create a step-by step tutorial for a math concept that you feel you are an expert at.
Few students enjoy homework, even though they know it is important. Write one to two paragraphs explaining the cause and effect of not doing your homework.	Suppose a new teacher has come to your school. In a letter, explain to this teacher what it is important to know about teaching 7th grade at your school.	Create a rubric for expository writing.
Select a scientific term and write one to two paragraphs explaining what that term means. Include examples.	Think about a book that has been made into a movie. Write a comparison/contrast essay that explains what is similar and what is different between the two.	Create a powerpoint comparing and contrasting two different characters from your favorite book or movie.
Write one to two paragraphs about something you recently learned that made you think. Explain what you learned and why it was important.	We have all watched someone perform either in sports, a musical performance, a presentation, or any kind of contest. Write a cause-and-effect essay that explains how a person's ability and other factors shape how he or she performs.	Create a brochure that could be given to new students to explain to them what WCMS is like.
